

NIKOLA PRLJETA

IT Engineer

SUMMARY

Product-focused IT engineer working across mobile, web and full-stack systems. Experienced in building and maintaining production applications across multiple ecosystems, with a strong emphasis on end-to-end delivery, product thinking, and system design. Currently working as an instructor in web technologies, mentoring developers from fundamentals to job-ready level.

TECH STACK

Frontend: Swift, SwiftUI, UIKit, React, React Native, JavaScript, TypeScript

Backend: Node.js, Ruby on Rails, Java (Tapestry)

Mobile Systems: CoreData, Combine, MapKit

Tooling: Xcode, VS Code, Neovim

Curious About: Rust, Go, Zig, Mojo, Django, Laravel

EXPERIENCE

Instructor - JavaScript Front-End

- Delivering structured curriculum in HTML, CSS, and JavaScript with hands-on labs and project-based learning
- Mentoring beginners through progression from fundamentals to job-ready frontend development

Mobile & Full-Stack Developer

- Built and maintained production iOS and cross-platform applications across Swift and React Native ecosystems
- Designed and implemented full-stack systems spanning Node.js, Rails, and Java environments
- Operated across product, engineering, and analysis roles in end-to-end delivery cycles

SELECTED PROJECTS

- Native iOS applications built with Swift & SwiftUI, following modern Apple ecosystem patterns
- Cross-platform mobile applications using React Native across shared and native layers
- Full-stack systems across Rails, and Tapestry, emphasizing end-to-end product delivery
